

Cockroach Treatment Preparation Instructions

Treatment Date:

Time:

- Remove all items from LOWER kitchen and bathroom cabinets/pantries. Place the contents in totes, on tables and/or on beds.
- Remove items from top of the fridge and stove.
- Pull furniture & items at least 18" away from walls to allow access to baseboards
- Place personal items such as toothpaste and toothbrushes, etc in ziploc bags
- Toys must be cleaned up and away from baseboards.
- Cover any reptile and/or fish tanks with a towel. Be cautious of heat lamp and unplug air pump for the duration of the vacate time. Be conscious of fish's air pump needs
- Remove, seal, or cover any food and dishes left in the home, or thoroughly wash exposed food contact surfaces after treatment.
- Tenants and pets must vacate for 3 hours from the time of pest technician arrival. Notify pest control in advance if you are unable to remove any pets so that arrangements can be made.
- Wipe down tables, counter-tops, food prep & eating surfaces once you return after treatment.
- Please notify your landlord, property manager or pest control if there are any pregnancies or medical concerns with the treatment. We can send pesticide label(s) and Safety Data Sheet(s) to discuss with your doctor, veterinarian prior to treatment.
- Do not enter home until after the re-entry time has expired. You may open windows to ventilate home if you choose to do so.
